

SAFETY CENTER
INCORPORATED®

INSIDE SAFETY

OCTOBER 2010

Volume 44 • Number 32

Making “Friends” with CalOSHA

- Reduction in injuries and illnesses
- Lower worker’s compensation costs
- Improvement in employee motivation
- Higher quality and productivity
- Community recognition as a leader
- Statewide recognition from their industry and government as a quality employer
- Increased job referrals and bid acceptance

Safety Center Incorporated will be hosting the next Cal/VPP Star Workshop on November 9, 2010 at Safety Center in Sacramento. The program will include an overview of the Cal/VPP Star Program Overview, gaining management commitment, how to encourage employee involvement, the role of the corporate manager and Cal/VPP Benefits, hazard analysis, hazard control and trainings, mentoring and a question & answer period.

Representatives from Cal/VPP Star Sites will share their practical experience in the Cal/VPP Star journey and the significance of implementing key elements. Cal/VPP Star consultants will also review the evaluation process and present some of the most common onsite findings during recent team evaluations.

Preregistration is required for this event. The cost is \$25 to cover continental breakfast, lunch and workshop materials. To sign up for this valuable workshop, please contact Rhondalyn Moran at (800) 825-7262 x 240 or email rhondalyn@safetycenter.org.

Cal/OSHA was the first agency in the nation to develop what is now called the Voluntary Protection Program (VPP), a program that specifically relies on the efficiencies gained by management, worker, and government cooperation to improve workplace safety and health. Since the inception of this project, Cal/OSHA’s cooperative consultation programs have blossomed into four different structured partnership programs, and Cal/OSHA continues to experiment with new approaches to partnering with labor and management to promote safety.

Benefits

Participation in one of the Division’s partnership programs will provide the following benefits. Some programs also offer an exemption from routine enforcement inspections.

Program Overview

California Voluntary Protection Program (Star and VPP Construction) is a top-level safety and health leadership program designed for fixed and non-site establishments.

SHARP (Safety and Health Achievement Recognition Program) is a mid-level recognition program that may offer eligible employers an exemption from Cal/OSHA Enforcement programmed inspections.

Golden Gate is an entry-level program for small high-hazard employers and is site specific. **Alliances** enable organizations committed to workplace safety and health to collaborate with OSHA to prevent injuries and illnesses in the workplace.

Have a safe Halloween!

California Safety Forums

Members *Only*

Sacramento Regional Safety Forum (SRSF)

November's Meeting Topic:

Workplace Violence
