OVERVIEW:

It's the law! As of April 2010, federal law requires contractors hired to perform renovation, repair and painting projects in homes, child care facilities, and schools built before

1978 that disturb lead-based paint to be certified and follow specific work practices to prevent lead contamination. Are you ready? Minimally, contractors should already be following 3 simple procedures: contain the work area, minimize dust, and clean up thoroughly. Fines will be hefty, so why not get the training and certification you need to keep safe and compliant?
