PROFESSIONAL SAFETY INSTITUTE 2010

MANAGEMENT SAFETY CERTIFICATE

Gain the skills necessary to implement & manage a successful safety program!

CONTROLLING RISK

Reaching beyond occupational safety and health, this course introduces risk management for the safety professional. Learn to minimize conditions and practices that pose risks to your organization. Subjects include: risk management and control; acceptable risk and loss establishment; the use of a safety management perceptions questionnaire; and discussions on many other topics.

May 7

MAKING SAFETY PERFORMANCE MATTER

This course provides an in depth review of successful safety program structures for both your organization and the people within your organization. Addresses shifts in paradigms and challenges set thinking patterns for gaining new insight into applying safety programs to achieve group cohesion plus manager and supervisor buy-in. Covers motivation through incentive programs, environments and situations that foster accidents and more!

July 9

SOLVING SAFETY PROBLEMS

This course teaches you the analytical and practical application tools needed for assessing and correcting safety problems professionally, as they occur, using real-life case studies. Given actual safety management issues, you will be encouraged to seek solutions while exploring what compromises a successful safety program. Includes a safety committee problem-solving template and a review of quantitative and qualitative safety program evaluation techniques.
